# LED MINI SPOT LIGHT

## LED DOT LIGHT

The effect of this little tiny thing is twinkling stars on the roof when you install amounts of those lights. The led inside the lamp emits directly down to the ground and with no lense or any optic components, the led chips are shinning with original lights, just like stars in the galaxy. We design this sery beacuse we want a roof like galaxy and the project effect proofs it to be real.

## LED MINI SPOT LIGHT

### LED DOT LIGHT

GD880A series is a updated version for GD880 series. Adding lens to the led chips, to prevent dazzle light directly from the led chips. Though its' light doesn't look light a shining star, it have got more soft light and give more light on the ground or objects on the ground. Installing those little fixtures by groups every other 30cm in the whole roof instead of installing a bigger recessed spot light every other 2 meter, it appears more fancy and attractive.

This series have got 4 default colors available and they almost match most of the ceiling color, no matter you want a harmony design or a conflict design. Except installed on the roof, it is also very good for bathroom. Just imaging lots of little light on the bathroom ceiling, far more fancy than a boring 5W spot light. And one more applicant is cabinet lighting. You can install this series in the shop cabinets , like cloth shop, wine shop and so on. It can be easily installed due to its little size and gives just enough light, no more and no less

## GUIDE FOR INSTALLATION IN SERIES GD880/GD880A/GD005A/GD001A

Drill holes on the ceiling  
20mm for GD880/GD880A  
30mm for GD005A  
40mm for GD001A

Installed power-supply on the ceiling  
power-supply will be supplied  
separately by manufacturer.  
Consult with seller's engineer for the  
specification of power-supply you  
need. 6-12pcs for one group is  
strongly recommended.

Connect the lamp each by each,  
using the junction cable supplied  
with the lamp, and put the end  
connector to the last lamp.  
Connect the first lamp to the  
power-supply.  
The default MAXIMUM distance  
between two lamps is 50cm.  
If you would like to make it more  
than 50cm, the junction cables  
must be longer.

With the design principle of being as simple as possible, we design this series of recessed spot light. Although it cost a lot of aluminum material to make the lamp casing from a solid aluminum trunk, the front cover looks so entirety and elegant. It has got perfect shape by seeing in front, one piece, same color, perfect straight curve, big shielding angle.

By using CREE CXA series Cob chips, the CRI of this series can reach up to RA90, and very high lumen output efficiency, up to 80lm per watt. The installation is also easy with easy connector between lamp and the power-supply

This series have got three default color, white ,gold, and black. Also it has got three sizes ,from 5W to 20W, output will be from 430lm to 1800lm. The light angle can be 15/24/38/60 degree, from narrow beam to wide flood. It can fulfill most requirements of home lighting and architecture lighting. The lamp body can be custom made to other colors if customer want something new in the ceiling. As we know, pure aluminum is very nice material ,it can be anodized or plated or power-coating, So this series will give customer choices as much as possible

## ANTI-GLARE LED DOWNLIGHT

---

This series LED downlight has got 3 different sizes and 3 different colors, so totally 9 items.  
3 inches is Dia105mm by 59mm height, with cut-off Dia90mm  
4 inches is Dia128mm by 59mm height, with cut-off Dia115mm  
6 inches is Dia175mm by 59mm height, with cut-off Dia160mm

Those items are good at Kitchen, toilet ceiling and for bedside lighting, also passage is a good place to put this series, for the elegant out-looking and anti-glare shade.

The second advantage from this series is the lamp color, aluminum anodized silver and gold is giving a metallic looking, clear, modern but not vulgar like shining chrome.

# LED DOWNLIGHT

We call this series MOOOON, because the original idea of the lamp comes from the FULL MOON, the moon at middle of the month is totally round and nothing defected. This series of lamp lights up just like full moon, very thin edge, the object is totally like a lighting ball from the ceiling, well-stacked and beautiful.

They have got four sizes: 3 inches, 4 inches, 5 inches, and 6 inches. Also two colors available, painted white and anodized brushed silver. They give enough light, good for passage, balcony, toilet, kitchen, and etc.

surface customizable

-  black paint equal to RAL9011
-  concrete grey paint similar to RAL7037

## CEILING RECESSED LED PANNEL LIGHT ULTRA SLIM AND BRIGHTNESS

We call this type of lamp PANEL LIGHT, because the whole lamp is extremely slim ,just like a panel. The theory of panel light is putting the led on the side of the lamp casing, 90 degree opposite of the lighting direction. There are three layers of acrylic lighting unit , on the front is a very thin acrylic sheet to make the light soft, the middle layer is a diffuser which turning the lighting direction from side to downwards, the back layer is a reflector to reflect the lighting downwards. the led give lights to the acrylic panels, the three layers of acrylic make the light all downwards to the ground.

This type of PNAEL LIGHT is very slim, efficient, soft light and other lots of advantage. We have got four sizes from 105mm to 280mm, the watt from 6W to 24W, it can fulfill most requirements.

There are also round shape and square shape, black and white color, and also other color can be custom made.

There is big difference between this series and other surface mounted spot lights, that is the lighting head could be moved freely along the aluminium extrusion. The light could be turned and moved ,it helps to light objects in unfixed position. It shows like a surface mounted downlight, but it functions like a track and several track lights.

## BAYMAX SERIES SURFACE DOWNLIGHT

This series is consisted of pendants, surface downlights, spotlights. The idea is to make a ultimate surface downlight, with perfect shape and perfect light. The baymax series has realized all of this purpose, with square shape but nicely curved, and 23 degree beam, white painting. All above perfectly match the modern house decoration.

The name of BAYMAX comes from a Japanese cartoon film. BAYMAX is the major character of the film. He is warm hearted, but very strong and skilled. He is trained to protect people. Just like Baymax, this series of light have got nice white housing, and strong warm heart-high lumen output, with no harm to people--with anti-glare angle and checker glass front cover.

**LED TRACK**

# LIGHTS

the secret of this series is the super slim track adopter. With the power-supply inside the cylinder of lamp body, the total lamp appears super slim, integral and pretty. The idea of this design is we just want a simplest track lamp beyond any complicated shape, just a cylinder on the track, nothing else. So we design the track adopter, put the power-supply in the cylinder, and make good heat management. Another advantage of this series is the big shielding angle up to 60 degree. It is very hard to see the led source even it lights straight down. It is a good series for home, store, museum, cafe, and etc. Just like a simple T-shirt, it can match almost any style of decoration. Three default finishing color, and four more custom made, three sizes and wattage, It could be a universal track light for any circumstance

although this series is boring,simple,just as the same as series came from any other supplies. The same aluminium extrusion,the same style,the same thin lamp body and same looking.however,LED make it another lamp,20W SMD led gives as much as the 1600lumens output ,which is the same as a 32W fluorescent tube gives,while the consumption is half.

LED is not the ultimate terminal for enerty-saving. The point is how people is thinking.Passun devote its designing philosophy in every aspect.We insist on not only saving on the lamp source,but also in material consumption. We always make sure that the material to make the lamp is just sufficient,no more to waste,and no less.

This lamp is design to fullfill the basic lighting requirement for the office,1600lm is just enough for a 1.4m desk and no more is needed. Three lamp colors could be customer made according to different office style.

- five surface color available four surface colors in stock
- 40W led per 1.5 meter long 20W led for 0.6 meter and so on
- Can be made to be more power double to 80W or other for the same length
- supplied with 1.2m hanging cable, electric wire, and connecting box

Chrome plated end cap makes the lamp noble and good quality

The hanging cable metal parts can move freely along the extrusion. It helps a lot in installation

**LED  
PANEL  
LIGHT**

The LED panel light become a type of fasion recently,because of its slim lamp body,easy installtion,low power consumption and low cost maintenance.

It's a trend that the LED panel will take the place of the fluoresent grille light for office lighting .And now we have seen this picutre and we have done something.

We design this series to make it unique to other LED panel from suppliers in the market. The difference is the solid looking shape of the extrusion,and 48W power.It gives as much as 3840lm soft and even light.

Every pakage will be supplied with all components for three types of installation:hanging,recessed, laying.

## GD-LQL001 / GD-LQL002 installation guide

---

- installed on a 600x600 grille ceiling
  1. switch off the main
  2. connect the power-supply to the main
  3. connect the led panel to the diver with connector
  4. put the panel to the ceiling from one side to the other

- installed on normal wooden ceiling
  1. cut a square hole on the ceiling  
580x580mm for GD-LQL001 series  
580x280mm for GD-LQL002 series
  2. switch off the main
  2. connect the power-supply to the main
  3. connect the led panel to the diver with connector
  4. reverse the spring and put the panel to the ceiling

- Hanging installation for GD-LQL001/GD-LQL002
  1. find the accessory package,  
fix the four nuts to the panel ,  
measure the distance between nuts ,  
fix the hanging cable to the ceiling accordingly
  2. switch off the main
  2. connect the power-supply to the main
  3. connect the led panel to the diver with connector
  4. adjust the height of the panel.

## High Quality and performance LED EDISON CANDLE BULB

Constant current power-supply inside

No flicker problem

High performance light, RA>75, efficiency as much as

95lm per watt for GD-LAMP output

Supplied with well designed packing and labling

2W/4W/6W optional, 2 watt for decoration shadelier

4W/6W for main lighting purpose
